PRELIMINARY REPORT ON THE TABULATION OF THE NATIONAL REGISTRATION,  
AUGUST, 1940.

---

To the Honourable James G. Gardiner, M. P.,  
Minister of National War Services:

---

Preliminary Statistical Tabulations

The National Registration was conceived and carried out primarily as a register of the military and labour potential of Canada. In accordance with this conception, the main tasks assigned to the Dominion Bureau of Statistics, in addition to the revision and permanent filing of the Registration Cards as received from Deputy Registrars, have been:- (1) the selection of single males of military age; (2) the listing of persons in some 1,250 specialized occupations; (3) the listing of persons with training in agriculture; (4) the selection of certain classes of aliens; and (5) the compilation of a general conspectus of the ages, birthplace, nationality, education, etc., of the Canadian adult population. The first of these involved the transfer of some 1,050,000 cards for the use of the Department of National Defence; the second, third, and fourth were met by the construction of lists giving the addresses and various personal and occupational information for about 2,200,000 names. These have been placed at the disposal of the Departments and others requiring such information.

The first four objectives have now been achieved. The present Preliminary Bulletin, and the final tabulations which will shortly follow, constitute the fifth part, which was not undertaken until the listing processes above-mentioned had been completed. As will be noted, the bulletin summarizes the results of the Registration, for Canada and for the Provinces, by ages, conjugal condition, birthplace of the registrant and of parents, year of immigration if born outside of Canada, year of naturalization of the foreign-born, racial origin, language spoken, educational status, state of health, disability, occupational and employment status, unemployment, farm background, etc.

In order to economize time and expense the tables herewith are based on a sample of the registration files. The figures are subject to revision as the final arrangement of the cards may possibly reveal some duplications or other sources of error.
